Where are we losing the most good orders?

States with at least 300 orders. Right-click a bar > Drill through > State Detail

Should Olist invest in retention?

National view: the state slicer is intentionally absent (retention tables are disconnected from the star schema).

Seller month-3 retention

Seller M3 Retention
53.22%

What does each metric mean?

Tier	Metric	Definition	DAX measure	Project 3 source
Diagnostic	Buyer Repeat Rate (window)	Share of eligible first-time buyers who buy again on a later calendar day within the chosen window; eligible = observed for the full window.	[Repeat Rate Within Window]	src/metrics.py: repeat_rate_within, first_two_purchases
Diagnostic	Seller Retention (Month 3)	Average share of sellers in an acquisition cohort still selling 3 months after their first sale month.	[Seller M3 Retention]	src/metrics.py: cohort_matrix. Note: P3 docs say 49.19%, the current marts g
Guardrail	Average Promised Delivery Days	Mean calendar days between purchase date and estimated delivery date over valid orders.	[Avg Promised Days]	src/metrics.py: ORDER_FACTS_SQL, monthly_kpis (promised_days)
Guardrail	Freight Value Share	Freight value as a share of item value plus freight value over valid orders.	[Freight Share]	src/metrics.py: ORDER_FACTS_SQL
Guardrail	Order Cancellation Rate	Share of all placed orders that end canceled or unavailable.	[Cancellation Rate]	src/metrics.py: ORDER_FACTS_SQL
Input	Delivered Rate	Share of valid orders that reached delivered status with a customer delivery date.	[Delivered Rate]	src/metrics.py: monthly_kpis (delivered_rate)
Input	Good Review Rate	Share of on-time delivered orders that received a 4-5 star review.	[Good Review Rate]	src/metrics.py: monthly_kpis (good_review_rate)
Input	New Customers	Distinct customers making their first valid purchase in the month.	[New Customers]	src/metrics.py: monthly_kpis (new_customers)
Input	On-Time Rate	Share of delivered orders that arrived on or before the estimated delivery date (day-level comparison).	[On-Time Rate]	src/metrics.py: ORDER_FACTS_SQL, monthly_kpis (on_time_rate)
Input	Valid Orders Placed	Orders placed in the month excluding canceled or unavailable orders.	[Valid Orders]	src/metrics.py: monthly_kpis (orders)
North Star	Good Orders	Monthly count of delivered valid orders that arrived on or before the promised date and got a 4-5 star review.	[Good Orders]	src/metrics.py: ORDER_FACTS_SQL, monthly_kpis (good_orders)
Rejected - why	Cumulative Registered Buyers	Rejected as North Star: monotonic, can never fall even when the platform deteriorates.	none (not built)	Project 3 metric dictionary
Rejected - why	Gross Merchandise Value (GMV)	Rejected as North Star: lagging financial outcome, blind to service quality. Nov 2017 GMV hit a record while on-time delivery fell to 87.6%.	[GMV] (kept as a guardrail)	src/metrics.py: monthly_kpis (gmv)
Rejected - why	Raw Review Score Average	Rejected as North Star: an unconditioned mean hides polarized 1-star vs 5-star distributions and is biased by delivery punctuality.	none (not built)	Project 3 metric dictionary
